

## BALLISTIC SHIELDS

# STANDARD

The standard ballistic shield comes in an array of sizes with the option to add an LED light system.

The United Shield range of ballistic shields incorporates the latest high performance materials technology and versatile handle systems that have been ergonomically developed over a number of years. They are available in a range of standard and bespoke sizes, and in a number of different protection levels.

The shields are maneuverable, lightweight and ergonomically designed to ensure maximum protection for operators in all tactical situations. Their multifunctional handles enable the shields to be used by both left and right handed people, and can also incorporate two additional handles to allow them to be held with the forearm vertically. The handles are robust, and collapsible for ease of use and storage, or fixed, depending on customers requirements.

The shields can be supplied with neck straps, allowing operators to hang them across the body, freeing up both hands for other tasks. To reduce damage to the edges of the shields when they are being used, they are covered by a special hard wearing rubber trim. Level IIIA and Level III shields have a curved radius, while Level IV shields are flat.

Size	Window 250 x 100 mm* (10.0 x 4.0 ins)	Weight	Window 250 x 75 mm (10.0 x 3.0 ins)	Weight
Micra 450 x 650 mm (17.8 x 25.5 ins)	N/A	3.6kgs (7.9lbs)	N/A	6.5kgs (14.3lbs)
Small 550 x 650 mm (21.7 x 25.5 ins)	N/A	4.4kgs (9.7lbs)	N/A	7.9kgs (17.4lbs)
